

# Tiger Stripes

## Standard Cable

## Tiger Stripes Cable

*Available on AmerCable CPE round jacketed cables only.*

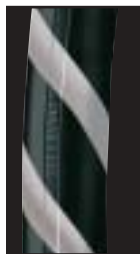

**Higher Visibility  
in low light  
provides**

**improved  
mine safety  
and increased  
up-time!**

AmerCable's "Tiger Stripes" is a value added process that vulcanizes a highly reflective tape directly into the outer jacket. This reflective tape dramatically increases the visibility of your power cables.

- Less cable damage due to accidental "run-overs" or equipment snags
- Increased up-time due to extended cable life
- Faster circuit identification
- Increased safety for personnel

The added visibility of AmerCable's **Tiger Stripes** can **improve mine safety** by providing easy circuit identification and reducing the frequency of cable failures due to accidental "run-overs" and equipment snags.
